BLOOD PRESSURE SCREENING

GOAL

To provide a resource to the public for assessment of blood pressure.

SERVICES PROVIDED

1. Provide office clinics to assess blood pressure. There is a charge associated with this service unless a medical provider has written an order.
2. Education and guidance on the blood pressure reading.
3. Provide a record of blood pressure reading for the client.

WHO IS SERVED

Juneau County residents.

INFLUENZA/PNEUMOCOCCAL/TETANUS VACCINE PROGRAM

GOAL

To protect individuals from developing influenza and/or pneumococcal and its related complications. To update tetanus status of adults.

SERVICES PROVIDED

1. Hold clinics in various county locations, schools, and industries with greater than 30 employees, making the vaccines convenient and accessible to residents.
2. Offer the vaccines to homebound individuals making the program available to everyone.
3. In an attempt to decrease any monetary barriers in obtaining these vaccines, the Health Department provides the flu vaccine and pneumococcal vaccine at low cost, and charges a \$3.00 administrative fee for the Tetanus (Td).

WHO IS SERVED

County residents 18 years of age and older to whom the above vaccines are appropriate.

OCCUPATIONAL HEPATITIS B SERIES

GOAL

To prevent the spread of Hepatitis B to people in high-risk occupations (e.g. healthcare workers)

SERVICES PROVIDED

1. Provide a series of three Hepatitis B vaccines. There is a charge associated with this service to cover the cost of the vaccine.
2. Review each client's health history to ensure no contraindication exists to the vaccine.
3. Provide every client a personal immunization record and maintain a permanent medical record of each client.

WHO IS SERVED

Juneau County residents requesting this service.

TETANUS BOOSTER

GOAL

Be a resource for individuals to obtain protection from tetanus often referred to as “lock jaw.” Tetanus is caused by a bacteria that produces a toxin in the body that attacks the nervous system.

SERVICES PROVIDED

1. Administer age-appropriate tetanus vaccine without charge for the cost of the vaccine. A \$3.00 agency administration fee applies, but no one will be denied for failure to pay the administration fee.
2. Review each client’s health history to ensure no contraindication exists to the vaccine.
3. Provide every client with a personal immunization record and maintain a permanent medical record for each client using our clinic.

WHO IS SERVED

Anyone who elects to attend sponsored immunization clinics held at the various locations. Clinics are held at Elroy, Mauston, New Lisbon, and Necedah.

TETANUS-DIPHTHERIA TOXOIDS & PERTUSSIS (TDAP) VACCINE TO ADULTS

GOAL

Provide vaccination of Tdap to families with infants in the household, thereby reducing risk of transmission of pertussis to infants. Pertussis, or whooping cough, is a bacterial infection that can lead to severe cough, difficulty breathing, pneumonia, and even death.

SERVICES PROVIDED

1. Administer age-appropriate Tetanus-Diphtheria & Pertussis vaccine without charge for the cost of the vaccine. A \$3.00 agency administration fee applies, but no one will be denied for failure to pay the administration fee.
2. Review each client's health history to ensure no contraindication exists to the vaccine.
3. Provide every client with a personal immunization record and maintain a permanent medical record for each client using our clinic.

WHO IS SERVED

Adults up to age 65 years that are close contacts of an infant.

TOBACCO-FREE COALITION

GOAL

The Juneau County Tobacco-Free Coalition was established in April 1998, in an effort to promote a healthier and cleaner Juneau County. The Coalition's mission is to support the efforts of the Wisconsin Tobacco Control Board by aggressively pursuing the elimination of tobacco use by partnering with communities to prevent tobacco use among youth, promote cessation, and eliminate secondhand smoke. The Coalition consists of key members from worksites, schools, healthcare facilities, law enforcement, and concerned community members.

SERVICES PROVIDED

1. Act as a resource for local businesses interested in implementing tobacco-free policies.
2. Provide display material at local events including Juneau County Fair, Relay for Life, World No Tobacco Day, Kick Butts Day, Great American Smokeout, and Child Development Days.
3. Work with schools in an effort to increase messages to students, faculty, and larger community.
4. Work with local media to promote dangers of tobacco use and secondhand smoke to the public.
5. Advocate for those affected by secondhand smoke.
6. Track local level data regarding tobacco use by youth, pregnant women, and adults.
7. Develop a strong and active coalition with a variety of community representatives.
8. Provide tobacco retailers with the education to prevent illegal sales.
9. Support and assist in organizing youth-based activities that allow for youth development and empowerment.
10. Provide educational presentations and materials on a variety of tobacco issues to day cares, community service organizations, employees, and the general community.

WHO IS SERVED

Residents of Juneau County.

Wisconsin tobacco sales rate to minors dropped to 5.5% in 2006.

Juneau County's tobacco sale rate to minors was 3.62% in 2006.

TUBERCULIN (TB) SKIN TESTING

GOAL

Provide TB skin testing to meet occupational or school-related criteria.

SERVICES PROVIDED

1. Provide Mantoux method TB skin testing.
2. Read test results in 48-72 hours.
3. Refer for any necessary follow-up as needed.

WHO IS SERVED

Juneau County residents. There is a cost of \$6.00 per test.

The cost will go to \$10.00 as of January 1, 2007.

WISCONSIN WELL WOMAN PROGRAM

GOAL

1. To improve access to preventive health services for low-income, uninsured, or under-insured women.
2. To eliminate preventable death and disability from breast and cervical cancer particularly among medically under-served women.

SERVICES PROVIDED

1. Reimbursement for health screening, diagnosis, and assessment for breast cancer, and cervical cancer.
2. Assuring appropriate tracking and follow-up for women screened through the Wisconsin Well Woman Program (WWWP).
3. Developing a provider network in which women can receive WWWP services. Women can see their own doctor for screenings as long as doctor/clinic is a provider of WWWP services
4. Provide information, education, and outreach programs intended to address known health risks in the general and certain target populations.
5. Case management for WWWP clients which include patient advocacy, identifying resources for financial or other assistance to remove barriers to services, facilitating appropriate referrals, and working with other providers and agencies to resolve pending issues.
6. Assist WWWP clients diagnosed with breast or cervical cancer with application process for Wisconsin Well Woman Medicaid (Treatment Component of program for uninsured women diagnosed with breast cancer, cervical cancer, or pre-cervical cancer of the cervix). Case manager will assist diagnosed WWWP clients with other cancer resources available in the area.

WHO IS SERVED

- Wisconsin women ages 35 to 64 with a primary focus on women ages 50 to 64.
- Households with incomes at or below 250% of the federal poverty guidelines.
- Women with no health insurance or insurance that doesn't cover routine check-ups and screening or unable to pay high deductibles and co-payments.
